

**RESEARCH IMPULSE
ORGANISATIONAL CAPACITIES
FOR RURAL SOCIAL INNOVATION**

MALIN LINDBERG
ASSOCIATE PROFESSOR

Rural social service innovation

Defining the concepts

Social innovation

Development of new solutions to societal challenges and social needs

Empowering involvement of disadvantaged groups

Cooperation over organisational and sectorial boundaries

Simultaneous change on individual, organisational, societal levels

Social service innovation

Improves quality and access in social services to better address social needs
(e.g. increased user-friendliness, need-adaptation or efficiency)

Empowerment of service users from specific social groups
by information, knowledge, recognition, voice or power

Especially crucial for rural areas

due to geographic and demographic challenges to service provision

Rural social innovation

in SEMPRE

Identification of urgent societal challenges of rural decline

Persistent outward migration

Economic downturn

Deteriorating social service infrastructures

Initiatives to increase the rural attractiveness by

Innovative forms of social service delivery

Empowering mobilization of disadvantaged groups

Multi-stakeholder involvement of local/regional community actors

Participatory workshops to delineate needs and develop solutions

Implementation of solutions in micro-projects

Institutionalising, transforming

Testing, implementing, organising

Involvement, needs, ideas

Complex, long-term rural challenges

Outward migration, economic downturn, declining social services

Temporary, short-term interventions

Enabling bottom-up experiments,
learning and innovative cooperation

Permanent, organised solutions

Ensuring sustainable conditions
and provision

Innovative services, methods etc.
Sustainable organisational forms

Reference

Edvik & Björk's chapter in *Social Entrepreneurship and Social Enterprises*, edited by in Lundgaard Andersen et al. (2016).

Institutional factors

impacting social innovation organisation

Temporary

Short-term funding and organisation

External policy objectives

Goal-oriented rationality vs. creative unpredictable processes

Legitimacy

Relevance among various stakeholders

Different institutional logics

Collaboration

Cross-sectorial partnerships

Public welfare-services systems

Reference

Edvik & Björk's chapter in *Social Entrepreneurship and Social Enterprises*, edited by in Lundgaard Andersen et al. (2016).

Organisational forms of rural social innovation

Nonprofit associations/foundations
formed to institutionalise the innovation

Social intrapreneurship
in public, private or nonprofit organisations

Social enterprises

Cooperatives, Work-integrating social enterprises (WISE) etc.

Other forms
social media platforms, informal networks etc.

Partnerships
between public, nonprofit, business organisations

Civil society organisations

in rural social service innovation

Regarded as the optimal social service providers and innovators as they are:

“supposedly more ‘rooted’ in the local civil society and more responsive to local needs than traditional top-down, bureaucratic public services”

“supposedly also ensure more democratic governance and user-friendly delivery processes”

But also risk being smokescreens:

“hiding both the selective reduction in public expenditure on social services and the growing inability of such services to reach certain groups”

Sustainable

social service innovation

Requires

Spaces for context- and user-sensitive, diversified initiatives bottom-up

and

Universal access to basic services guaranteed by the public system top-down
